WHAT OUR CUSTOMERS HAVE TO SAY!

"Tech was outstanding! Informative, knowledgeable, friendly, on time, accomplished what I needed. Quick! 'Had a few minutes left in the hour...so checked the whole system' Thanks!"

- Greg, Liberty Lake

"I have been using Living Water for two years and my lawn looks great. The gentleman that does my lawn always lets me know when he is here which I appreciate. I would definitely recommend Living Water."

- Chris, Fairwood Area

"My lawn has completely turned around since I started letting Living Water handle my lawn care. I was with a competitor for almost TEN YEARS waiting to get the results I got with LW in just over a year. Love the ethics of this great company."

- Michele, Country Homes Area

Commit your work to the Lord & it will succeed - Proverbs 16:3

Hi Friends & Neighbors,

Usually when I write the fall newsletter, I write something along the lines of, "it's hard to believe that fall is here." This year I am happy to say that fall is back! Honestly on September 29th it looked like winter was here. So much for our winter false positive.

Your sprinkler system should suffer no ill effects from the freaky September snow storm and a few nights of below-freezing temps. This all kind of fits into the theme for 2019.

Weirdness! Who can forget about the 2 feet of snow in March? Normally I have to remind people to water as long as they can in late September and early October, but this year I am pretty sure we are ok from this point on. If you have not scheduled your sprinkler blow out, you should ASAP.

This is the time of year that we put lawns and landscapes to bed. It's definitely not a time to neglect them. Fall and winter months give our landscapes the time they need to recuperate from summer stress. Most of our urban plantings are hybrids developed for beauty and function in an urban/suburban setting. There is nothing wrong with that. Actually there is so much right with it. Turf filters ground water, cools temperatures, and creates oxygen. Our non-native plants and trees also release oxygen and cool down their environment, as well as create beauty and add to our well-being. That said, our help helps them do all of this better!

Now is the time to fall-feed turf, trees, and shrubs. They will turn plant food into carbohydrates to weather the winter better. Don't forget about putting sulfur on your lawn. It is nature's disease control, as well as offering tons of other benefits. Begin to mow your turf shorter now; it will handle winter much better. Don't let leaves lie on your lawn. Debris left on your lawn will actually suffocate turf. Now is also the time to prune trees and shrubs for health and to minimize winter/snow damage.

Commit your work to the Lord & it will succeed - Proverbs 16:3

Guess what! You can handle everything I just mentioned on your own, or we can do it for you! We know how to put your landscape to bed for a long winter nap. If you need any help, call us or visit our website.

THANK YOU

From all of us at Living Water, thank you SO very much for allowing us to work for you.

God's Richest Blessings
Mike

Fall Landscape Tips from the #LivingWaterFam!

Carolyn (General Manager) - Make sure to deep water all of your trees & shrubs before winter fully hits.

Pat (Estimator) - Prune trees & shrubs to prevent winter damage!

Ron (Co-Owner) - Keep lawn free of all debris.

Mike D. (Mower) - Mow the lawn as short as you can, bringing the height down gradually to the lowest setting.

Jeremy (Spray Tech) - Get a fall Sulfur treatment! It helps to prevent snow mold.

Keith (Pest Control) - Watch for any ants in your house. Give us a call if you notice them.

Brian (Production Manager) - Fall services are the most important for the health of your landscape, don't skip your fall applications!

Justin (Sprinkler Tech) - If you can't get your sprinklers blown out in time, leave the water to the system on and cover the valves. Water under pressure takes longer to freeze, this can help buy you some time.

**If you have any questions,
give us a call!**
